

## EXAMINATION REFERENCES

The NBC examinations were developed on the basis of practice in the field and are not based on a specific textbook or course of study. Therefore, many sources of information are appropriate for study and review. The references listed in this publication must not be regarded as the only useful publications. They should be considered only as representative sources of the types of information covered by the examination.

There are several useful study materials available for purchase through the NADL's online store at [www.nadl.org](http://www.nadl.org). The study materials that can be found there include, but are not limited to, Visual Reference Guides (one per each specialty - Digital Workflow Visual Reference Guide coming in 2024), an Examination Preparation Guide, and the U.S. Air Force Manuals (which includes Dental Laboratory Technology, Basic Sciences, Removable Prosthodontics, and Orthodontics (2005), Air Force Pamphlet 47-103, Volume One and Dental Laboratory Technology, Fixed and Special Prosthodontics (2005), Air Force Pamphlet 47-103, Volume Two).

*The following references are in addition to those listed above. Most of these references can easily be purchased through Quintessence Publishing.*

## GENERAL REFERENCES

*Hohmann, Arnold and Hielscher, Werner*  
Principles of Design and Fabrication in Prosthodontics  
Chicago, Quintessence Publishing, 2016
